SEFA SCR Rumination & Activity Monitoring System is designed to monitor INDIVIDUAL COW & HER PERFORMANCE:

- SEFA SCR system has rumination technology which shows group rumination as well as individual animal thru which you can monitor health of cows and also feed.
- It shows raw rumination, daily rumination, rumination change, rumination change by 2 hrs and rumination deviation in 3 days.
- This system indicate activity of individual animal as well as group or herd. This system gives the percentage of cows that are breathing heavily/ Panting by which you can arrange cooling system for your herd and you can understand actual condition of atmospheric temperature change and arrange best suitable solution for your dairy farm.

**GRAPH GREEN SHOWS ACTIVITY AND PURPLE INDICATE RUMINATION.**

# MEASURING TOOL

मापन यंत्र

Quick test for farmers

Mini test duo for dairy professionals

Mini test for technicians
